Education

Master of Science in Computer Engineering Aug. 2025 - May 2027
California State University, Fullerton

Bachelor of Science in Computer Science Aug. 2023
California State University, Fullerton

Relevant Experience

Software Engineer | **Life Stages LLC** | *San Francisco, CA (Remote)* Sept. 2023 – Feb. 2025

- Developed the **Align app** using Swift, SwiftUI, and Firebase, offering personalized habit-building interventions to promote sustainable mind-body health at users fingertips.
- Collaborated with a senior developer to design backend architecture of the final product using Node.js and Firebase, improving data retrieval speed by 40%, reducing query response time for designated API endpoints
- Utilized React Native for front-end components alongside Node.js and Firebase on the backend while collaborating with senior developer to design the backend and frontend architecture of the final product,
- Engineered comprehensive REST APIs for the Align web app to manage privacy settings, user creation, and activity tracking

Webmaster / Student Assistant | **Cal State Fullerton** | *Fullerton, CA* Jan. 2021 – Aug. 2023

- Developed and maintained the day-to-day technical operations for the department website of the Academic Advisement Center for the campus population of over 40,000 students using HTML5, CSS3, and JavaScript to create visually appealing and user-friendly interfaces
- Redesigned the Academic Advising Center website during and after the pandemic, improving mobile accessibility and enhancing the overall user experience.
- Provided in-person, email, and Zoom support to students, answering questions about General Education (GE) requirements and analyzing Titan Degree Audits (TDA).
- Assisted in planning and facilitating summer orientation sessions for incoming freshmen, helping students understand academic requirements and plan their coursework in collaboration with advisors.

Project

MovieNest | *Visit live site* Feb. 2025

- Launched a scalable and efficient movie library management system for universities using Next.js, PostgreSQL, TailwindCSS, and Drizzle ORM, streamlining movie borrowing, user management, and administrative operations. Deployed on Neon and integrated ImageKit.io for seamless media storage and management.
- Designed and implemented key features, including an admin panel for movie and user management, a user panel for tracking borrowing history, and real-time workflows powered by Upstash Redis.

Laguna Web App | *Visit live site* Aug. 2024

- Launched a Django-based social media web application inspired by the facebook, utilizing Python, Django, JavaScript, HTML, and CSS to create a responsive and dynamic user experience.
- Implemented backend functionality using Django framework, including user authentication, profile management, and content administration, with deployment on Linode and AWS for scalable and secure hosting.

Technical Skills

Languages: Python, JavaScript, C/C++, Typescript, Java, Swift, SQL, R, PHP

Frontend: ReactJS, React Native, HTML, CSS, Bootstrap, SwiftUI, TailwindCSS, AngularJS, Wordpress

Backend: MySQL, Node.JS, Express, Django, Firebase, Mongodb, Redis, Springboot, Snowflake, FastAPI,

Tools/Technologies: AWS, Docker, OpenGL, QtCreator, TCP/IP, Postman, Git, RStudio, Jira, Confluence

Relevant Coursework: Algorithms, Artificial Intelligence, Data Science, Computer Networking, Back-End Engineering
