Relevant Experience

Software Engineer (contract) | **CloudBig Technologies LLC** | *Irvine, CA* Oct. 2024 – Jan. 2025

- Led the migration from WordPress to React.js, improving site performance and scalability; built reusable React.js components with Redux and Hooks, reducing bounce rate by 15% and improving page load times by 40%
- Developed and optimized backend functionality by engineering RESTful APIs using Python and Django, reducing response time by 20%; automated deployment using GitHub Actions
- Worked closely with an Agile team and the business owners to understand their specific needs, provided ongoing support, and delivered backend solutions that aligned with their operational goals and customer experience.

Software Engineer | **Life Stages LLC** | *Los Angeles, CA* Sept. 2023 – Oct. 2024

- Developed the MVP for the **Align app** using Swift, SwiftUI, and Firebase, offering personalized habit-building interventions to promote sustainable mind-body health at users fingertips.
- Utilized React Native for front-end components alongside Node.js and Firebase on the backend while collaborating with senior developer to design the backend and frontend architecture of the final product,
- Engineered comprehensive REST APIs for the Align web app to manage privacy settings, user creation, and activity tracking

Web Developer | **Cal State Fullerton** | *Fullerton, CA* Jan. 2021 – Aug. 2023

- Developed and maintained the website for California's largest public university, serving over 40,000 students, using HTML, CSS, JavaScript, and best practices with the team of developers
- Led the redesigning of the Academic Advising Center's website during the pandemic, improving access to advising resources by 25% and ensuring a seamless user experience across devices.
- Collaborated with advisors and developers to design and implement a semester planner tool, used by over 10,000 students annually to streamline course scheduling.

Junior Software Engineer | **Tripcon Engineering** | *Remote* Aug. 2019 – Jan. 2021

- Helped expand the business to an international level by developing and maintaining full-stack web applications for the corporate website and e-commerce operations using Python (Django), HTML, CSS, and JavaScript, improving customer accessibility and increasing sales conversions by 52%.
- Provided post-deployment support for web applications, managing case queues and resolving escalated tickets by debugging Python, JavaScript, and API-related issues, achieving 98% SLA compliance

Project

MovieNest | *Visit live site* Feb. 2025

- Launched a scalable and efficient movie library management system for universities using Next.js, PostgreSQL, TailwindCSS, and Drizzle ORM, streamlining movie borrowing, user management, and administrative operations. Deployed on Neon and integrated ImageKit.io for seamless media storage and management.
- Designed and implemented key features, including an admin panel for movie and user management, a user panel for tracking borrowing history, and real-time workflows powered by Upstash Redis.

Technical Skills

Languages: Python, JavaScript, C/C++, Typescript, Java, Swift, SQL, R, PHP

Frontend: ReactJS, React Native, HTML, CSS, Bootstrap, SwiftUI, TailwindCSS, AngularJS, Wordpress

Backend: MySQL, Node.JS, Express, Django, Firebase, Mongodb, Redis, Springboot, Snowflake, FastAPI,

Tools/Technologies: AWS, Docker, OpenGL, QtCreator, TCP/IP, Postman, Git, RStudio, Jira, Confluence

Relevant Coursework: Algorithms, Artificial Intelligence, Data Science, Computer Networking, Back-End Engineering

Education

Bachelor of Science in Computer Science Fullerton, CA

California State University, Fullerton
